

Do You Know?

Many Electric Companies Offer Energy Efficiency Programs and Rebates

The General Assembly charged the Pennsylvania Public Utility Commission (PUC) with implementing Act 129 of 2008 and guiding consumers and electric utilities toward achieving the legislation's overall goals of reducing energy consumption and peak electric demand. The PUC is implementing the Act in phases to ensure that electric utilities provide energy efficiency and conservation programs to customers in the most cost-effective manner possible.

The Act directs only the state's seven largest electric distribution companies (EDCs) with more than 100,000 customers to provide EE&C plans, although UGI Electric, which has less than 100,000 customers, does offer similar energy efficiency programs and rebates.

Find out how your electric company can help you lower your energy bill and put *MONEY* back in your pocket!
